

JEFRY GUEVARA

Senior software developer

[LinkedIn](#) | [Github](#) | jefryguevarav@gmail.com | <https://yotfil.com/>

Software developer with 5 years of experience, primarily focused on front-end solutions. Proficient in creating scalable applications using modern JavaScript and TypeScript, with strong expertise in frameworks like Angular and libraries such as React. Skilled in managing backend applications using Node.js, including GraphQL and REST APIs. Expert in developing optimized Progressive Web Applications (PWAs). Passionate about improving code efficiency and continuously learning best practices, with a proven track record of achieving objectives under tight deadlines.

EXPERIENCE

Globant — *Web UI Developer*

NOV 2022 - PRESENT, Colombia

- Developed scalable and optimized solutions across various modules using micro-frontends with angular 16.
- Proposed and implemented numerous reusable UI components across different modules using atomic design principle.
- Contributed to the creation of a UI component library, enhancing scalability and development speed.
- Engaged in pair programming to craft efficient and scalable solutions under tight deadlines..
- Performed code corrections and bug fixes with quick turnaround times.
- Collaborated effectively within a team using agile methodologies such as Scrum and Kanban.
- Develop components with high accessibility standards.

TechStack: *Angular 8+, Angular 17, Docker, Azure, React, jest, karma, agile, jenkins*

Epam Systems — *Software engineer*

MAY 2022 - OCT 2022, Colombia

- Implemented optimized and scalable solutions tailored to client requirements.
- Conducted code reviews, corrections, and bug fixes.
- Worked collaboratively in an agile environment, following Scrum and Kanban methodologies.

TechStack: *React, vanilla js, jest, agile*

Avionos — *Front-end developer*

SEP 2021 - APR 2022, Colombia

- Developed and implemented optimized and scalable solutions for various client projects
- Successfully delivered projects within tight deadlines.
- Refactored legacy code and enforced clean code practices.
- Analyzed new features and proposed improvements where necessary.
- Developed and integrated React with Adobe Experience Manager (AEM).

TechStack: *AEM, React, vanilla js, jest, agile*

IFX Networks — *Front-end developer engineer*

SEP 2020 - MAY 2021, Colombia

- Led the frontend development of the customer portal for multiple countries in the Americas.
- Designed and developed scalable and optimized solutions to create reusable components.
- Led the UI/UX design process to enhance customer experience.
- Developed a design system from a frontend perspective for the client.
- Established the foundation for all future frontend work.

TechStack: *Angular 8+, material angular, node js, Azure, agile*

Bogotá Institute of Technology (BIT) — *Front-end specialist*

SEP 2020 - MAY 2021, Colombia

- Optimized educational programs for future developers.
- Conducted online classes for groups of 20+ students, guiding them through the learning process and providing essential tools.
- Developed internal applications and tools to improve teaching methodologies.
- Instructed future developers on the MEAN stack.

TechStack: *Angular 8+, material angular, node js, mongo db, express js*

FREELANCER EXPERIENCE

THELOGICTRAINING — *Sr Frontend Development - Professor*

JUL 2023 - FEB 2024, Colombia

- Analyzed and refactored legacy code to create more scalable and maintainable solutions.
- Implemented strategies for optimal performance in PWAs in Angular 16, focusing on offline capabilities with Firebase.
- Conducted code reviews and bug fixes.
- Engaged in pair programming to deliver efficient and scalable solutions under tight deadlines.
- Integrated MSAL and Microsoft Entra with Angular.

TechStack: *Angular 16, Firebase, material angular, node js, Azure, MSAL, entra, karma*

Acámica — *Sr Frontend Development - Professor*

APR 2021 - DEC 2021, Colombia

- Led virtual classes for groups of over 20 students, mentoring them through the learning process and giving them tools to master the topics.
- Taught React and its various libraries, leading students to build complex applications from scratch.

TechStack: *Angular 8+, material angular, node js*

EDUCATION

Bogotá Institute of Technology (BIT) — *Bootcamp*

NOV 2019 - MAR 2020

Full stack developer (MEAN Stack)

deBakatas — *Bootcamp*

NOV 2019 - MAR 2020

Develop and web design

Universidad Nacional de Colombia

JAN 2006 - ABR 2012

Bachelor's degree in graphic design.

LANGUAGES

Worked on numerous projects with international teams, maintaining effective and professional communication.

Español — *Native*

English — *B1/B2*
